

Vodafone Hungary
is looking for a
Dashboard developer intern
in the field of **Radio Network Optimization!**

Are you interested in the telecommunications industry and curious about the feeling of working at one of the world's leading mobile communication company?

If your answer is YES, **join us as a Technology Intern** and start building your career!

You will have the chance to gain valuable professional experience during your studies in an innovative multinational environment.

Do you want to combine or develop your knowledge about mobile radio network and code programming?
Join us!

The Network Optimization team focuses on maintaining and developing the radio network quality. Answering the present fast changing environment we want to speed up the investigation and analysis of radio network related KPIs. We want to develop our complaint handling capabilities and display KPI trends on map using our special dashboard.

You will be involved in

- Developing a browser based dashboard, which combines and visualizes data from various internal and external data sources
- Trace tool handling from dashboard
- GIS related visualization, KPIs on map
- Analyzing data along the radio network related KPI

You are the person we are looking for if you

- have an active full-time student status (ideally graduate student)
- are interested in mobile radio network behavior
- have strong analytical skills
- have SQL knowledge
- have experience in web development: PHP, HTML, CSS, JavaScript or other developer tools
- knowledge of telecom sector is an advantage
- experience in data visualization is an advantage

As a Technology Intern you will work **part-time (20 hours/week)** for **6 months** so you can stay focused on your studies while **gaining real hands-on experience**.

During the program, we guarantee **exciting tasks and projects** full of challenges and also a **competitive salary**.

We will also assign a **buddy** to you, who will help you get to know the company and will answer all your questions.

After the internship, you will have the opportunity to apply for our **IT/Engineering Discover Program**, which is a 24-month long career program dedicated to IT and Engineering fresh graduates, which is based on rotations among the different areas of our Technology Department.

Location: **Budapest, Vodafone Hungary HQ**

If we have caught your attention and you would like to apply, then upload your English CV to our career site on the link below.
