

Vodafone Hungary
is looking for an
IP Implementation Engineer intern
in the field of **Technology Enterprise!**

Are you interested in the telecommunications industry and curious about the feeling of working at one of the world's leading mobile communication company?

If your answer is YES, **join us as a Technology Intern** and start building your career!

You will have the chance to gain valuable professional experience during your studies in an innovative multinational environment.

As an IP Implementation Engineer intern, you will have the opportunity **to work together with experienced senior engineers/architects** and see how to design and build an enterprise grade network to our customers.

You will be solely responsible for **deploying network devices on the customer premises** and **configure them** with remote support from the senior engineers, while integration to the testlab of new equipments and their end-to-end testing will also **widen your practical knowledge**.

You will be involved in:

- Integration of new equipments into the test system
- End-to-end testing of network devices
- On-site deployment and configuration of network devices
- Creating standard configurations for services like Leased Line, Internet, IPVPN, SIP, etc
-

You are the person we are looking for if you:

- have an active full-time student status (ideally graduate student)
- have good knowledge of TCP/IP
- interested in routing and switching protocols and security solutions
- have analytical mindset
- have some hands-on experience with devices from CISCO or other main network vendors

As a Technology Intern you will work **part-time (20 hours/week)** for **6 months** so you can stay focused on your studies while **gaining real hands-on experience**.

During the program, we guarantee **exciting tasks and projects** full of challenges and also a **competitive salary**.

We will also assign a **buddy** to you, who will help you get to know the company and will answer all your questions.

After the internship, you will have the opportunity to apply for our **IT/Engineering Discover Program**, which is a 24-month long career program dedicated to IT and Engineering fresh graduates, which is based on rotations among the different areas of our Technology Department.

Location: **Budapest, Vodafone Hungary HQ**

If we have caught your attention and you would like to apply, then upload your English CV to our career site on the link below.
